* Indicates required question

1. Which of the following best describes "ransomware"? * 2 points

- Software designed to secretly track your keystrokes to steal passwords.
- A program that generates excessive, unwanted pop-up advertisements on your browser.
- Malicious software that locks your device or encrypts your files, demanding payment to restore access.
- A legitimate tool used by IT administrators to monitor employee network traffic.

When a messaging application uses "end-to-end encryption," what does that mean for user privacy? 2 points

- The app requires a strong password to open on your smartphone.
- The app's parent company can read your messages to check for illegal activity, but hackers cannot.
- Messages are automatically permanently deleted from the device immediately after they are read.
- Messages are scrambled into a code that only the sender's and recipient's devices have the keys to unlock and read.

When evaluating search engine results, why might the first few links at the top of the page not always be the most reliable or objective sources? 2 points

- Search engines automatically prioritize the oldest and most outdated websites first.
- The top links are frequently "Sponsored" results or paid advertisements, rather than the most naturally relevant information.
- Search algorithms randomly shuffle the top five results every time a user hits enter.
- The top spots are strictly reserved for government (.gov) and educational (.edu) domains, which might not answer commercial queries.

If you find a graphic or image via a standard internet search, what is the safest legal and ethical assumption to make before using it in a public project? 2 points

- It is automatically copyrighted; you cannot use it without permission unless it is explicitly licensed under Creative Commons or the public domain.
- It is perfectly legal to use as long as you copy and paste the URL link beneath the image.
- You can use any image you want, provided you are not making direct financial profit from the project.
- All media uploaded to the public internet automatically forfeits its copyright protection.

In simple terms, explain what it means to "store files in the cloud" and provide one major benefit of doing so. 2 points
